

Technology Information Governance Secondment Services

Short and long-term onsite expertise with cost predictability to solve your information governance challenges.

Microsoft Office 365 migrations, updating and rolling out new legal hold technology and processes, securing sensitive data from internal and external threats, remediating large pools of “dark data” in a safe and defensible manner, building or operationalizing privacy programs – information governance projects can span a wide range of legal, technology, process and compliance issues.

For companies that need to address these challenges, yet do not have the necessary in-house resources to develop, manage or implement the program, FTI Technology’s Information Governance, Privacy & Security (IGP&S) team can provide experts for short or long-term onsite secondments to help with:

- Auditing existing information governance and e-discovery processes and technology and creating actionable plans for improvement;
- Developing and implementing information governance programs across a variety of business lines and jurisdictions, and in compliance with regulations and industry best practices;
- Evaluating technology solutions as well as developing the RFP requirements, managing the RFP process and negotiating contracts;
- Acting as strategic point person to drive complex processes with transparency and accountability;
- Collaborating across teams, including legal, IT, compliance and information security, and ensuring key executive buy-in;
- Creating communication channels, training and other change management best practices to ensure adoption;
- Hiring, training and managing employees and budgets to ensure optimal efficiencies and ongoing compliance.

Our team of professionals – comprising former regulators, forensic investigators, law firm counsel, litigation support, in-house counsel and IT – provide your company with:

TECHNICAL EXPERTISE

IGP&S professionals have extensive experience working with off-the-shelf and proprietary enterprise platforms and applications, as well as IT methodologies. Recent secondment projects have included archive migrations, backup tape remediation, sensitive and ‘dark data’ identification and indexing projects, legal hold technology evaluations and implementations, Microsoft Office 365 deployments, and large-scale forensic data collections.

LEGAL AND REGULATORY EXPERIENCE

Our global team is adept at developing and implementing information governance programs that adhere to specific legal or regulatory requirements, including GDPR, HIPAA, PCI DSS, etc. The IGP&S team can also develop defensible documentation and has the credentials and experience to testify in court about the methods used for any information governance project. Our team is comprised of J.D.s, MBAs and practitioners with a wide range of legal, technology and security certifications. These include CISSP, CIPP/US, EnCE, ACEDS, AccessData Certified Examiner, Exterro Platform Administrator, Relativity Certified Administrator, and Ringtail Administrator certification.

PROJECT MANAGEMENT SKILLS

The IGP&S team can help clients more effectively manage projects from inception through completion. No matter the type or size of the matter, we can leverage proven, out-of-the-box workflows or design custom processes to quickly and cost-effectively deliver results. We work within program parameters to develop standardized processes and templates, implement best practices, and document final workflows that integrate seamlessly with the client’s business model.

IGP&S secondees can deploy to the company site quickly, and can remain onsite for weeks, months or for multi-year engagements. Clients benefit with onsite, experienced professionals that can tap into a deep bench of experience of the full IGP&S team both with cost flexibility and predictability.

TRUSTED GLOBAL LEADERS IN INFORMATION GOVERNANCE, E-DISCOVERY AND INVESTIGATIONS

FTI Technology's Information Governance, Privacy & Security (IGP&S) Services provides the people, process and technology to deliver concrete improvements with demonstrable value for organizations. We assist in developing, implementing and documenting information governance programs that reduce corporate risk, secure data, improve the e-discovery process and enable faster and deeper insight into data.

ABOUT FTI TECHNOLOGY

FTI Technology solves data-related business challenges, with expertise in legal and regulatory matters. As data grows in size and complexity, we help organizations better govern, secure, find, analyze and rapidly make sense of information. Innovative technology, expert services and tenacious problem-solving provide our global clients with defensible and repeatable solutions. Organizations rely on us to root out fraud, maintain regulatory compliance, reduce legal and IT costs, protect sensitive materials, quickly find facts and harness organizational data to create business value.
