# Visual Analytics for Investigation

Corporations respond daily to a variety of investigation projects and regulatory requests. Whether large or small, local or remote, quickly assessing the details of a large collection of documents is the new day-to-day reality for compliance and legal teams. The Radiance visual analytics platform provides these teams with a highly scalable analytics platform that quickly brings clarity and meaning to the investigation. Fast and powerful, Radiance helps organizations rapidly collect, visualize, and assess key themes and files associated with the investigation. With Radiance, legal and compliance teams can:

- Create a single investigation repository to save time and reduce the costs and complexity of new or recurring investigation activities.
- Ingest and enrich data from a variety of sources both behind the corporate firewall and in the cloud.

- Perform a variety of in-house investigations more efficiently.
- Master data details in a fraction of the time spent using disparate systems.
- Develop better investigation strategies earlier in the process.

Radiance transforms millions of data points into fact patterns that are easy to recognize and understand. With multiple entry points into the data, including date ranges, social networks and communication patterns, Radiance will shine a new light on your data.

The Radiance Advantage: Speed, Performance, Innovative Analysis Tools

The Radiance platform is a highly scalable, fast and cost-effective platform for managing complex electronic data. While nimble enough to manage gigabyte-sized projects, the software was designed to deliver standout performance on massive data volumes that include millions of documents and files. Radiance also provides a secure repository for evidence objects and metadata, enabling collaboration among investigators.

Radiance Workflow for Investigations

Radiance is ideal for teams concerned with finding facts, determining scope, framing timelines of critical activity and identifying the people and organizations impacted by an investigation. Much more than a simple culling tool, Radiance allows teams to quickly analyze vast sums of information to radically reduce data and discern critical facts across disparate repositories. Using Radiance, teams can:

Connect to Your Critical Data

Radiance can collect data from a wide variety of public and private cloud-based sources including:
- Office 365, Google Apps, Dropbox, Box, and more
- Local file shares, e-mail servers, legacy file systems, Nuix cases, StoredIQ exports and more

Enrich Data, Amplify Trends

The Radiance enrichment process can create high-quality investigative workspace via:
- Near similar analysis
- Concept and entity extraction
- Classification of documents in more than 50 languages
- Identification of social networks, communication patterns and e-mail threads

Visualize to Discover Facts

Easy to use, integrated visualizations cut through dense and complex data to reveal insights into:
- Social networks
- Relationships between individuals and organizations
- Key terms and phrases in the data set
- Dates and date ranges

Analyze Quickly

Powerful advanced search and browse features allow for rapid exploration, filtering and analysis of:
- File types and volumes
- Custodians
- Correspondence
- Social network
- Languages
